

# Filtercon

## Whole House Water System

**Great tasting Fresh Filtered Water  
from every faucet in your home**  
~ 20 Years of proven quality and performance ~

### Bathing

*Gentle enough for a baby's skin*

### Drinking

*Tastes clean and natural*

### Showering

*Water feels smooth, not slippery*

**Go Green, and live healthy,  
with a Filtercon Home System**

**Eliminates Chlorine, bad tastes, and odors**

**Reduces hard water problems naturally**

**No chemicals, No Salt, No wasted water**

**No more plastic bottles *polluting* our planet**

**Maintenance Free, computerized**

**All of this for just pennies a day !**

**1-800-550-1995**

## Our Filtercon Systems Are Time Tested With Many Years of Proven Performance!

Remember, "If You Don't Have a Filtercon, You May Be the **"Filter!"**"

### Inside the Filtercon Patented Hydromagnetic Technology

#### Automated Backrinse Control

Totally computerized automated performance control valve

#### Stage One

Up to 2.5 cubic feet (69 lbs.) of high grade granular carbon

#### Hydromagnetic Module

The patented HYDROMAGNETIC module conditions the water non-chemically by restructuring and realigning the polarity of the mineral molecules without removing the beneficial minerals from the water. It helps reduce hard water problems

#### Stage Two

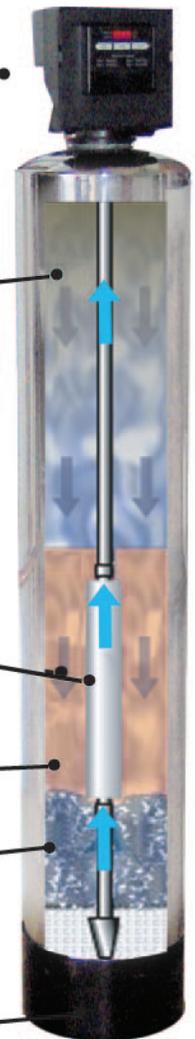

Up to 20 lbs. of Quartz (Nature's own filtration system)

#### Stage Three

K.D.F. 55 Medium consisting of high purity copper-zinc granules

#### Solid Construction

The beautiful outer tank is made of solid polished stainless steel. The inner tank consists of a Poly Glass Pressure Vessel. This durable and attractive system may be installed indoors or out (climate permitting).

Please contact us for assistance and price quotations for your particular needs.

# Filtercon: The System Used and Recommended By Leading Doctors.

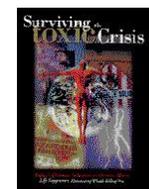

F. BATMANGHELIDJ, M.D.

**Dr. Batmanghelidj** is the worlds leading authority on water and the human body, having lectured world wide, and is the author of the best selling book “Your Bodies Many Cries For Water.” We are proud that he chose a Filtercon System for his family and home.

Most people have no idea of the degree of contamination our drinking water has faced over time. Water is source of all life and it is the #1 thing our body depends on each day. Can you imagine what we have been contaminating our bodies with everyday? The reason why I chose the Filtercon is for the same reason - to have the satisfaction in knowing that the water I’m drinking is safe. The Filtercon uses advanced technology that uses no chemicals, salt, or other additives that may harm the quality of water. I highly recommend this product for everyone. ”

--**Dr. William Randall Kellas, Ph.D, Nutritional Biochemistry**  
Founder of the Center For Advanced Medicine, Encinitas, CA  
Host of “Health Talk-A Second Opinion”, KPRZ & KKLA Radio  
Author of the book, “Surviving the Toxic Crisis” and others.

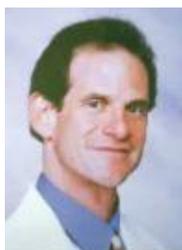

Renowned thyroid and diabetes researcher. Presided as President, Editor, and Board member, of the prestigious Journal of Applied Nutrition during a 20 Year association. I replaced my old whole house filter with a Filtercon System and my water is so improved that I highly recommend it to everyone.

Dr. Michael Walczak. M.D.

“Many water systems will remove the bad taste and odors of community water. In addition, the Filtercon removes the chlorine that can have medical consequences. Many people are not aware that chlorine is absorbed through the skin while bathing or showering as well as from drinking water. This is a system that works on all the water in the house and not just drinking water. The water has significant health benefits. Finally Filtercon leaves in all the healthful minerals, that so many people have depleted.”

--**Neil W. Hirshenbein, M.D.**  
Personal Founder and Medical Director  
Physicians Clinic, La Jolla, CA & El Cajon, CA

Dr. Mark Drucker, MD is the Medical Director of the Center For Advanced medicine. Under Dr. Drucker’s direction the Center has become renowned for providing patients with an integrated holistic treatment approach., Dr. Drucker also selected the Filtercon water treatment for his home and recommends it to his patients!

--**Mark Drucker M.D.**  
Medical Director of the Center for Advanced Medicine

# Chlorine in Your Shower and Bath

Chlorine is used almost universally in the treatment of public drinking water because of its toxic effect on harmful bacteria and other waterborne, disease-causing organisms. But there is a growing body of scientific evidence that shows that chlorine in drinking water may actually pose greater long-term dangers than those for which it was used to eliminate. **These effects of chlorine may result from either ingestion or absorption through the skin. Scientific studies have linked chlorine and chlorination by-products to cancer of the bladder, liver, stomach, rectum, and colon, as well as heart disease, atherosclerosis (hardening of the arteries), anemia, high blood pressure, and allergic reactions. There is also evidence that shows that chlorine can destroy protein in our body and cause adverse effects on skin and hair.**

“The presence of chlorine in water may also contribute to the formation of chloramine in the water, which can cause taste and odor problems.”

“Since chlorine is required by public health regulations to be present in all public drinking water supplies, it is up to the individual to remove it at the point-of-use in the home.

**Kemysts Laboratory**  
Dr. Riddle, Ph.D.

**“Cancer risks among people drinking chlorinated water is 93% higher than among those whose water does not contain chlorine.”**

**U.S. Council Of Environmental Quality**

**“Drinking tap water that is chlorinated is hazardous, if not deadly to your health.”**

**Healthy Water For A Longer Life**  
Dr. Martin Fox

**“Known carcinogens are found in drinking water as a direct consequence of the practice of chlorination, a long establishing public health practice for the disinfection of drinking water.”**

**Municipal Environmental Research Lab**  
Francis T. Mayo, Director

**“Chlorine is the greatest crippler and killer of modern times. While it prevented epidemics of one disease, it was creating another. Two decades ago, after the start of chlorinating our drinking water in 1904, the present epidemic of heart trouble, cancer, and senility began.”**

**Saginaw Hospital**  
Dr. J.M. Price, M.D.

**1-800-550-1995**

Filtercon- has no information that any particular consumers' water supply has the water quality problems or health hazards referred to in this report.

**“The cause of atherosclerosis and resulting heart attack and strokes is none other than ubiquitous chlorine in our drinking water.”**

**Coronaries/Cholesterol/Chlorine**  
Dr. J.M. Price, M.D.

**“A Professor of Water Chemistry at the University of Pittsburgh claims that exposure to vaporized chemicals in the water supplies through showering, bathing, and inhalation is 100 times greater than through drinking tap water.”**

“As chlorine is added to kill pathogenic microorganisms, the highly reactive chlorine combines with fatty acids and carbon fragments to form a variety of toxic compounds, which comprise about 30% of the chlorination by-products.”

“During the mid-70s, monitoring efforts began to identify widespread toxic contamination of the nation's drinking water supplies, epidemiological studies began to suggest a link between ingestion of toxic chemicals in the water and elevated cancer mortality risks. Since those studies were completed, a variety of additional studies have strengthened the statistical connection between consumption of toxins in water and elevated cancer risks. Moreover, this basic concern has been heightened by other research discoveries.”

**The Nader Report-Troubled Water On Tap**  
Center for the Study of Responsive Law

**“Evidence points to chlorine-based compounds (orcanochlorines) as significant contributors to the epidemic of chronic illnesses in humans, including breast cancer in women, and reproductive, developmental, immunological, behavioral and endocrine disorders. In addition, chlorine-based chemicals, like CFC's and other refrigerants, are primarily responsible for the destruction of the Earth's protective ozone layer.”**

**Greenpeace. Jan-Feb-Mar 1993**

**“A long, hot shower can be dangerous. The toxic chemicals are inhaled in high concentrations.”**

**Bottom Line August 87**  
Dr. Julian Andeiman, Ph. D.

**“Skin absorption of contaminants has been underestimated and ingestion may not constitute the sole or even primary route of exposure.”**

**American Journal Of Public Health**  
Dr. Haline Brown

**“You Get More Exposure From Taking A Shower Than From Drinking the Same Water.”...Summary statement from a recent study at a major University and as reported in Science News, Vol. 130, Sep 20, 1986**

# Filtercon Technologies

## Average Skin Absorption vs. Oral Ingestion

	Skin Absorption	Exposure Time	Oral Ingestion	Daily Water Consumption
Adult Bath	63%	15 min	27%	2 liters
Infant Bath	40%	15 min	60%	1 liters
Child Swim	88%	1 hr	12%	1 liters
Total Avg	64%		36%	

The above information is an excerpt from  
Healthy Water for a Longer Life written by Martin Fox, Ph.D.

Total Home Water Filtration and Conditioning System

## What Everyone Needs to Know About Chlorine

This is the complete article from the Australian Magazine, *Nature & Health*. Vol. 10. No. 4., Issue Summer 1989. It is the best documented information that we have found in 10 years on the subject of chlorine, particularly on the subject of chlorinated water in the shower. We hope this is informative for you.

### Article published by:

**Wheldon Young Production Pty. Ltd. 327 Eastern Valley Way, Chatswood, New South Wales 2067, Australia From "One Hundred Years Of Water Chlorination," Pages 44-49, by John F. Ashton, Chief Chemist Australian Food Research Laboratories and by Dr. Ronald S. Laura, Professor in Education, University of Newcastle and Chairman, Sports Medicine and Health Committee, Hunter Academy of Sport, New South Wales.**

Unless we are fortunate enough to live in an unpolluted rural environment, and collect our own water (or have affixed some type of water purifier to our tap), the peculiar odor and taste of the liquid in our glass stand as persistent reminders that the water we drink contains chemicals. Generally, the most noticeable of these is chlorine.

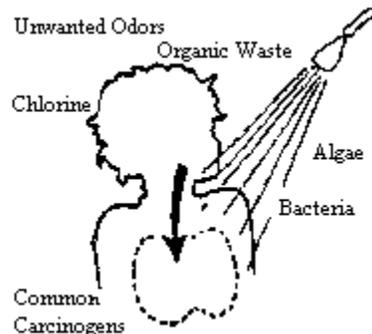

We have come to accept the presence of chlorine in our drinking water as one of the necessary, though slightly unpleasant aspects of maintaining community health. Somewhere along the way, most of us have learned that a number of contagious diseases such as typhoid and cholera have been virtually eradicated by filtering and chlorinating our municipal water supplies.

The crucial question which many of us never learned to ask, however, is whether chlorinated water represents a health hazard in its own right. In what follows we shall urge that in the light of recent research on the subject, it is clear that water treated with chlorine should be regarded as potentially detrimental to the health of the community.

### Chlorinated Water and Unknown Hazards Of the Shower

There is another side to the chlorine-water story. When we return from a gym workout, a jogging session, or a game of squash, not only are we thirsty but also we usually shower or bathe. We have been taught that cleanliness and health go together, and indeed they do, when chemical-free water is used, however, bathing may be much less healthy than we ever supposed.

Gasses are as a rule less soluble in hot water, and when water is heated or boiled dissolved gasses are released. Boiling water is as we noted earlier a way in which the free chlorine content in water is greatly reduced, the chlorine escaping into the air.

When we take a hot shower or run a bath we can sometimes smell the chlorine released as it escapes from the hot water. In a confined shower recess, however, especially one with poor ventilation, the chlorine escapes from the water as we continue the hot shower and steadily increases in concentration in the air we breathe. The olfactory threshold for chlorine is about 3.5 PPM (parts per million) so when we can smell chlorine the concentration is already above this level. The lethal concentration of ten-minute exposure is about 600 PPM and we suggest that regularly taking hot showers with chlorinated water could pose a health risk. Chlorine causes pulmonary edema, and it would seem likely that regular exposure to chlorine gas even at low levels such as a normal showering, may reduce the oxygen transfer capacity of the lungs. This could be a critical factor for athletes and for others prone to heart failure.

## **Pharmaceuticals Found in Drinking Water!**

These cartoons are meant to be funny but they also highlight one of today's "facts of life!"

**"If you don't have a filter, "you" are the filter!"**

**That's right! It's your liver and kidneys that have to do the heavy work!**

That's why today's educated consumer recognizes the value of a Filtercon total home filtration system for their home, providing economical, clean, great tasting water from every faucet, bath, and shower in the home. And it's computerized, that means maintenance free!

A Filtercon whole house system is not an expense it's an investment! It will provide you with years of clean filtered water for drinking, cooking, and bathing for the entire family for just "pennies" a day it can save you thousands of dollars over the years.

**Pharmaceuticals found in drinking water, affecting wildlife and maybe humans.**

**Call Filtercon toll free at 1-800-550-1995 for information on your total home filtration system.**

**1-800-550-1995**

## MODERN HYDROMAGNETIC TECHNOLOGY

### THE FILTERCON TOTAL HOME FILTRATION AND CONDITIONING SYSTEM USES MODERN PATENTED HYDROMATIC TECHNOLOGY

- Filters out chlorine bad tastes, and odors from every faucet, bath and shower in the house
- Reduces hard water problems without adding chemicals; requires no maintenance.
- Does not remove healthy minerals, which also gives a great taste to the water.
- Leaves water feeling naturally clean and crisp; leaves skin feeling soft and refreshed; hair silky.
- Requires no reverse osmosis. Provides clean filtered drinking water from every faucet, bath and shower in the house.
- No wasted water-Requires no reverse osmosis
- No cartridge or filter change maintenance  
Requires no reverse osmosis
- System cleans itself automatically once per week;  
Uses only 20-30 gallons
- Expelled water contains no salt and is applied to grass or vegetation whenever possible, eliminating water waste.
- Computerized system automatically cleans itself
- No maintenance or repair costs.
- Eliminates need for buying bottled water. Drink delicious tasting water from any faucet.
- The convenience of being able to drink delicious water from any faucet at any time contributes to a healthy lifestyle.

VS

## OLD SALT TECHNOLOGY

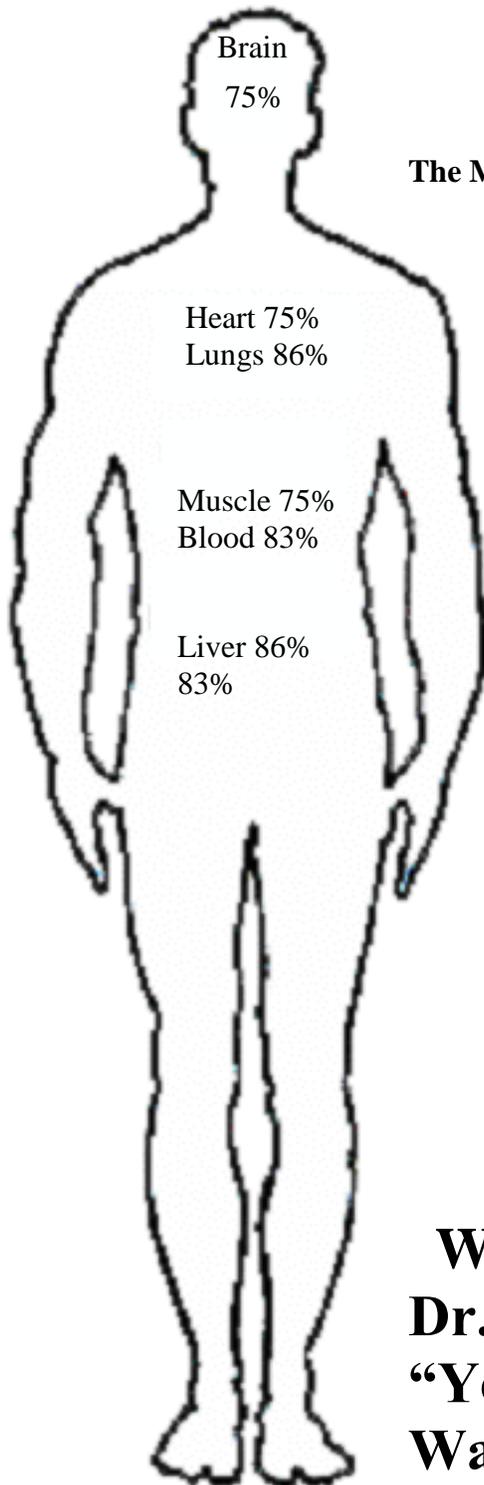

### WATER SOFTENERS DEVELOPED IN 1938 USE SALT OR POTASSIUM

- VS Does not filter water
- VS Requires constant addition of salt or Potassium to water
- VS Removes healthful minerals
- VS Salt residual makes water feel slippery or slimy – a common complaint is, “I feel like I can’t wash the soap off.”
- VS Requires reverse osmosis under sink to filter salt from drinking water at only one faucet
- VS Reverse osmosis wastes from 3 to 7 gallons (depending on model) for each gallon flowing from the faucet
- VS Reverse osmosis requires filter changes
- VS Regenerates up to 3 times per week; wastes as much as 150 gallons of water per week
- VS Regenerated wastewater contains salt and cannot be used on grass or vegetation which it would kill. Many communities are now becoming Brine restricted; no longer allowing salt laden wastewater to be put down the drains because it eventually pollutes groundwater
- VS Water softeners require a constant addition of salt or potassium and periodic reverse osmosis filter changes
- VS Requires continuous maintenance and repair costs
- VS Many people continue to purchase bottled water for drinking and cooking
- VS The inconvenience of lugging bottles of water from the store and sometimes running out, inhibits good water drinking habits

## Did You Know Your Body Is Between 70-80 % Water?

### **Chlorine is Present in Your Water and Your Skin Absorbs Water!**

#### **The MOST Essential Nutrient**

The body is made up of 70-80% water. Water is one of the four main nutrients of the body.

#### **Why is Water so Important to Our Bodies?**

All chemical reactions in the body take place in water. Every cell in the human body is bathed in water, which contains materials to keep them vibrant. Water is a transporter of nutrients and oxygen for proper function of the body's tissues. Water acts as a natural air-conditioning through perspiration. Water is essential for digestion and Kidneys absorption of vitamins and minerals. Water keeps our skin moist and supple, as well as a natural lubricator for our joints and internal organs.

#### **Does Our Body Store Water?**

The body keeps a reserve store of fuel, such as stores of fat, which can be tapped in emergencies, but although we are made up with 70-80% water, we have no built-in water tank to tap into when running dry. Water is involved in every bodily function, so it's hardly surprising that its lack can lead to mental and physical breakdown. As dehydration becomes severe the result can be alarming, for example, loss of elasticity in the skin, muscular weakness, severe dryness of the throat, disorientation, and finally hallucinations.

**We highly recommend you read Dr. Batmanghelidj's famous book. "Your Bodies Many Cries For Water".**

# Go Green with Filtercon

**No Chemicals, No Salt, No Wasted Water!**

Feel good that you're not contributing to the millions of pounds of **non-biodegradable** plastics polluting our planet.

Feel safe that you're not drinking **chemicals** leaching from plastic bottles.

Know that you're not dumping **salt** into the **eco-system**.

It's the system used and recommended by so many doctors and health professionals

Our **green product** is made in the **U S A**

Remember, "If you don't have a Filtercon –  
**You are the filter!!!**

# Filtercon Whole House Systems Certifications

## Hard Coconut Shell Granulated Activated Carbon

Tested and listed under ANSI/NSF Standard 42 for Aesthetic Effects

---

## Quartz

Drinking Water Treatment System Components Classified by Underwriters Laboratories Inc.® in Accordance with Standard ANSI/NSF 61

---

## KDF Media 55

Tested and listed under ANSI/NSF Standard 61 for Health Effects.

---

## T.U.V (Technischer Überwachungs-Verein)

The T.U.V. is a prestigious German organization very similar to the U.L. (Underwriters Laboratories), which tests and certifies products for safety and efficiency. Systems may not be sold overseas without this rating.

## Whole House Water System

### Why Choose A Filtercon for Your Family?

Here's a dozen good reasons!

1. **Proven Performance & Reliability** since 1997.
2. We have the highest A + rating with the Better Business Bureau.
3. Our system is used and recommended to patients by many Doctors & Health Professionals.
4. You get great tasting water from every faucet in the house
5. Our Green product uses No **Chemicals, Salt,** or Wastes Water.
- 6 It's Computerized – No Maintenance for the home owner.
7. Our systems come with a Lifetime warranty ( Ltd.)
8. Our system is entirely made in the USA.
9. All components are NSF tested and approved.
10. Our prices are consistently under market for our quality system.
11. We provide free water testing
12. Our trained sales representatives are knowledgeable, courteous, and helpful, not assertive.
